bfittler@mcgrathnicol.com

Ben advises organisations on strengthening performance, governance and accountability. With more than ten years' experience across the Australian public and private sectors, he supports clients to design practical frameworks, enhance decision-making and address complex assurance and financial challenges.

Ben has a strong track record in performance framework design and implementation, governance and compliance reviews, and financial and forensic analysis. He is recognised for translating complex policy, reporting and risk issues into practical actions that support stronger organisational performance.

Ben regularly leads complex engagements and delivers clear insights, pragmatic recommendations and high-quality outcomes for clients operating in highly scrutinised environments.

Engagement Experience —

- **Performance Frameworks & Reporting:** Design, review and implementation of performance frameworks and measures to support strategic alignment, strengthen accountability and provide decision-makers with meaningful insight into organisational performance.
- **Program Review, Evaluation & Organisational Improvement:** Reviews of program design, implementation and administration, together with organisational reviews, to assess delivery effectiveness, governance, stakeholder management and opportunities to strengthen operating models, service delivery and organisational capability.
- **Governance, Risk & Assurance:** Reviews of governance, risk and assurance arrangements to strengthen oversight, mitigate operational risk, improve control effectiveness and support better organisational capability and decision-making.
- **Financial Analysis & Modelling:** Financial viability and risk assessments, benchmarking, cash flow analysis and financial modelling to ensure sustainable service delivery and support procurement, funding, policy and commercial decision-making.
- **Compliance, Forensics & Blockchain Tracing:** Compliance reviews, forensic audits, investigative work and blockchain tracing to address regulatory, financial and integrity risks, including in matters involving digital assets, complex financial analysis and court-related proceedings.
