Matt is a well-regarded operational and strategic enterprise security risk expert and forensic investigator with more than 27 years' experience.

Matt works with clients to support the development and implementation of enterprise security strategies. Matt has held senior executive roles within government enterprises and corporations in the telecommunications and critical infrastructure sectors. His cross domain enterprise security expertise equips him to deliver holistic solutions to clients and the ability to design, deliver, implement, and advise on the operational aspects of security and integrity programs.

Matt works with operational and strategic enterprise security teams and brings his combined experience in security strategy, governance, national security, personnel security, insider risk, cyber security, financial crime investigations and crisis management and incident response. Prior to moving into industry, Matt worked in law enforcement for ten years in the field of criminal investigation and major crime.

Engagement Experience —

- Development of enterprise-wide security risk frameworks through to third-party supply chain security risk assurance programs.

- Complex criminal and forensic investigations into fraud, financial crime, conflicts of interest, IP theft, and integrity and misconduct matters.

- Leading cyber incidents, and broader crisis and incident management matters across large and complex organisation.

- Cyber tabletop exercises and broader awareness training, such as phishing drills, and associated cyber security threat awareness.

- Counterparty due diligence and security due diligence programs, including management of DISP obligations.

- Foreign interference, personnel security, and insider risk program development, overseeing external reviews and operational management.

- Responsibility for the governance, risk and compliance program with specific focus on security risk, SOCI Act and other security regulations.

- Development and implementation of regulatory compliance programs and risk mitigation strategies to drive better outcomes.

- Board awareness and training programs on all aspects of security risk.
