mwroniak@mcgrathnicol.com

Mark is a technology and cyber professional with extensive experience in the development, management and execution of IT security strategies, advice, architecture, and assessment activities.

Mark has supported clients across a wide range of sectors including banking and finance, retail, critical infrastructure, and government. He has implemented innovative solutions and security strategies, positioning clients as industry leaders in cybersecurity maturity.

He has worked in a variety of roles covering leadership, strategy, governance, policy, regulatory readiness, architecture, and consulting. Mark is an excellent communicator, bringing a unique mix of soft skills coupled with a mature and disciplined approach. He is able to deliver engaging and relevant cyber messages across all levels of business and technology.

Mark previously co-founded, built, managed, and sold Aleron, an award-winning cybersecurity multidisciplinary professional services firm that was acquired in 2019.

Engagement Experience —

- Built and delivered third party assessment services including site visits of several offshore outsource providers for a world leading multinational fast-food chain and an Australian big four bank, using ISO27001 and corporate security policy as the benchmark.

- Developed and delivered a Cryptographic Key Management strategy for a large Australian financial institution.

- Led the security team designing and developing a solution to migrate a major retail chain to a new network and coordinated the sale, delivery, and installation of security infrastructure at over 1000 locations to be centrally managed.

- Designed and led cyber transformation replacement of a big four bank endpoint protection platform for over 30,000 devices.

- Led the implementation of ongoing penetration testing services for multiple clients.

Qualifications & Memberships —

- Bachelor of Mathematical and Computer Science

- SABSA Chartered Security Architect – Foundation (SCF)

- AISA Member, Australian Information Security Association

- CCIE Emeritus (Cisco Certified Internetworking Expert – Security)

- CCSI (Cisco Certified Systems Instructor)

- RSA Certified Systems Engineer
