ipasha@mcgrathnicol.com

Imran has over 18 years of experience working with numerous Government Departments and Agencies. Imran leads teams across complex issues by providing clients with internal audit services, IT reviews, performance reviews and reporting, financial analysis, compliance matters, and assistance with second line defence functions.

Imran has provided external and internal audit in both the public and private sector. Imran has strong communication and relationship building skills, and a strong focus on delivering quality service.

Imran is responsible for leading teams to deliver a range of advisory services and has developed a sound understanding of better practice with respect to governance, risk and key control frameworks. Imran works in partnership with his clients and values open communication and collaboration, enabling him to deliver high quality outcomes, and to build strong and collaborative relationships.

### Engagement Experience —

#### Internal Audit

Imran supports a number of Commonwealth department and agencies with internal audit services, including setting up internal audit functions or uplifting existing internal audit functions.

Imran assists clients to address current and emerging risks by developing assurance frameworks and supporting 'heatmaps'. These provide greater structure and purpose for the use and deployment of assurance resources.

#### Risk Management

Imran assists organisations to develop effective governance, risk and compliance tools and frameworks. He helps organisations implement solutions to make effective risk-based decisions.

He understands that Commonwealth agencies need tailored plans for risk management and that a generic process is insufficient for Accountable Authorities to meet their obligations under the PGPA Act. He assists agencies to identify their critical controls, articulate and operationalise their risk appetite, and develop and maintain tailored management frameworks for risk identification, evaluation and treatment.

### Qualifications & Memberships —

- Member, Chartered Accountants Australia and New Zealand
- Professional Member of the Institute of Internal Auditors
- Bachelor of Commerce (Double Major in Accounting and Economics)
- LEAN Fundamentals

### Performance Reporting

Imran supports Commonwealth agencies to mature and improve their performance reporting. This includes gaining a deep understanding of the organisation to identify the 'performance story'. He tailors solutions by undertaking workshops (executive groups and intensive one-on-one stakeholder consultations) to understand the organisation's performance reporting aspirations. He leads engagement with business areas to scan the existing data universe to translate aspirations into tangible processes and methodologies.
