Jonathan is an eDiscovery specialist with over 15 years' experience working in litigation and investigations focusing on evidence management, disclosure and the use of technology.

Jonathan regularly works with law firms, government agencies and corporate clients throughout New Zealand. He has experience managing teams in Big 4 consultancies, service bureaus, as well as in a major Sydney law firm. He actively works with numerous platforms and systems, is actively immersed in advanced analytics and review strategies, and manages projects of varying sizes and complexities.

Recently, Jonathan has been focusing on assisting clients with regulatory responses as well as building bespoke review methodologies involving advanced analytics and CAL/Assisted Review technologies.

Engagement Experience —

- Assisted an NZ Regulator with discovery services related to an insider trading investigation.

- Assisted a corporate client investigating an ex-employee theft of IP and COI.

- Assisted NZ Police with the Royal Commission of Inquiry including evidence management, technology and review support.

- Assisted the Royal Commission of Inquiry (NZ Disaster) with software, training/support services and trial presentation.

- Assisted NZ Police with a large-scale mortgage fraud matter including disclosure and the presentation of evidence in court.

- Provided advice and assisted an NZ Regulator with the setup and support of electronic courtrooms for several high-profile finance company trials.

- Assisted an NZ Regulator with discovery services in multiple cartel investigations including the processing and management of the evidence.
